

POWER DRIVE

Revolutionary eMobility modification for all 2LIFT lines

Make handling heavy items easier and safer with our innovative Power Drive solution. This eMobility modification is designed to transform the way you move and handle heavy objects, and it is compatible with all our 2LIFT lines for industry, pharmaceuticals, and food production.

With a Power Drive lift from 2LIFT, your operator will experience significantly less physical strain. The self-propelled feature allows easy transportation of heavy objects, such as barrels or rolls, from storage to the production area.

Ergonomics and safety are the cornerstones of our approach to effective handling, and Power Drive significantly reduces the risk of overload injuries.

BENEFITS OF POWER DRIVE:

- **Optimal safety** Built-in emergency stop, foot protection, and Hold-to-Run ensure safe working conditions.
- **Ergonomic design** User-friendly control unit integrated into an ergonomic handle for optimal comfort and easy operation.
- **Strong capacity** Effective handling of up to 500 kg, making it ideal for demanding tasks.
- **Practical operation** Integrated power indicator provides an overview of operating status.
- **Stability and flexibility** Two electrically driven fixed wheels for smooth and precise maneuvering.
- **24 Volt system** Safe and reliable energy source for all applications.

Experience the difference with Power Drive. Contact us today to learn more about how this innovative solution can optimize your production and protect your employees!

TECHNICAL SPECIFICATIONS

POWER DRIVE		
Category	Add On	
Power Supply	24 Volt	
Max. Speed	4 km/h	
Motor	Brushless DC Motor	
Static Holding Moment	30 Nm	
Number of Motorized Wheels	2	
Wheel Type	Slip-resistant	
Wheel Material	Polyurethane elastomer 75 Shore A	
Safety Standards	CE	
Safety	Emergency stop, foot protection, and Hold-to-Run	
Maximum Weight	150 lines	150 kg
	300 lines	300 kg
	500 lines	500 kg

ADD ON FOR

- N** Steel lift IP31 with lifting capacity up to 500 kg.
- SN** Stainless steel lift IP31 with lifting capacity up to 500 kg.
- SF** Stainless steel lift IP65 with lifting capacity up to 500 kg.
- SP** Stainless steel lift IP65 (Cleanroom) with lifting capacity up to 500 kg.
